

go green with nimue

Nimue Skin Technology continues to lead the way not only in the development of advanced skin care but we are also committed to a sustainable future. We are one of only a few brands that have invested in a solution against pollution! Nimue takes pride in the fact that almost all of our packaging is fully recyclable!

Did you know that Nimue confirmed its environmental responsibility a decade ago when the refill system was introduced to consumers, a world first? By doing this we limit the impact of packaging disposal on the environment.

Are you wondering what a carbon footprint is? It is a measure of impact our activities have on the environment and in particular climate changes. Nimue can be seen as a secondary footprint that is a measure of indirect CO emissions from the whole life cycle of products we use those associated with the manufacture and eventually breakdown. Eg:- all acrylic bottles and jars from Nimue's skin care range can be recycled... some are even melted to make number plates!!

Going "green" has entered our daily lives where the 5 R's are constantly taken into consideration: Restore, Respect, Reduce, Re-use, Recover. Reduce your carbon footprint by sharing our vision for an even cleaner brighter future - recycle!

nimue express kit

The express kit is Nimue's core prescriptions captured in an express kit. This kit is ideal for expo's, travelling and an express nimue experience for new clients.

environmental express kit

12ml cleansing gel, conditioner sachet, nimue day, moisture plus, 12ml spf 20 and 12ml exfoliating enzyme

problematic express kit

12ml cleansing gel, conditioner sachet, purifier, rejuvenating mask and 12ml spf 20

hyperpigmented express kit

12ml cleansing gel, conditioner sachet, day fader, night fader, 12ml spf 20 and 12ml exfoliating enzyme

nimue boosters

Nimue offers 6 intensive treatment serums based on state of the art formulation and ingredient technology that target specific demands of unhealthy skin with unequalled effectiveness and precision.

The serums are prescribed as an additional treatment according to the skin's specific requirements and act in synergy with nimue core prescriptions, actively enhancing the skin restoration and rejuvenation process.

Homecare treatment guidelines

- For optimum results, a suitable treatment serum must be prescribed according to individual requirements, by a skin treatment professional after a consultation.
- Use under normal day and/or night cream.
- Store serums in a cool dry place and do not expose to direct light or sunlight.

Alpha Lipoic Activator

skin classification:

suitable for environmentally damaged skin | hyperpigmented skin | problematic skin

ingredients:
