

new nimue colourscience

Nimue colourscience consists of four products that combine advanced formulations with innovative packaging. This compact product range includes treatment foundation, treatment mineral powder, treatment lip colour and treatment lip gloss. With its unique ingredients and scientific formulations based on 5 key ingredients including micro powders of semi precious stones, this range will change mineral make-up forever! Nimue Colourscience mineral powder does not contain talc and the whole range is fragrance free!

Q&A

colourscience range

What makes nimue mineral make-up unique?

Mineral make-up is currently the fastest growing trend within the make-up industry. While most mineral brands are generally made up of Iron Oxides, Zinc Oxide, Mica and Titanium Dioxide, Nimue Mineral Powder also includes Citrine, Amethyst and Tourmaline Powder.

What are the benefits of nimue's mineral make-up?

- FDA & JP approved mineral make-up
- Key ingredients include 3 micro powders of semi precious stones
- Semi precious stones have an energising effect on the skin
- Lightweight products that reflect light and boost skin radiance
- Fragrance free
- Provides adjustable coverage

cover with science

nimue treatment foundation

A new generation of liquid make up that feels like a second skin. This innovative formula presented in a state of the art airless dispenser has a particular balance of raw materials resulting in a super thin lightweight fluid formula, yet providing a high level of coverage for a natural, smooth and skin brightening finish on all skin types and conditions.

benefits

- Fragrance free
- Weightless
- Stay true finish for all day wear
- Light diffusing effect softens lines and imperfections
- Second skin foundation perfects skin tone with a natural finish
- Sun protection equivalent to spf 10-15
- FDA (Food and drug administration in USA) & JP (Japanese regulations) approved

nimue treatment mineral powder

A lightweight, luminous and soft mineral loose powder in a luxurious self dispensing brush. A powder veil that melts perfectly onto the skin, blending evenly with a non-powdery, sheer and bright finish for a healthy glowing and smooth complexion.

benefits

- The minerals are derived from semi-precious stones, Amethyst is used for harmony, Tourmaline for energy and Citrine for it's rejuvenating and energising properties to improve microcirculation, rebalance the skin and fight the effects of stress.
- Titanium Dioxide screens the skin against sun damage.
- Provides a sheer layer of pure colour, perfects skin tone and protects the complexion with a luminous and glowing finish.
- Talc free
- Fragrance free

nimue treatment lip colour

A super sheer, yet creamy lip colour in a moisture rich emollient base for a moist and dewy effect with lip plumping ingredients for fuller lips. Effortless sheer and shine finish with just the perfect natural touch of colour.

benefits

- Lip plumping properties
- Fragrance free
- Great application with excellent control and ultra sheer colour lay down
- Soft creamy texture

nimue treatment lip gloss

Enhance lips with a non sticky fluid formula filled with shiny polymers providing a hint of colour and brilliance for depth and fullness of lips.

benefits

- Soft creamy texture
- Fragrance free
- Bouncy sensation and shine
- Uncompromising performance in glide, filming and comfort properties
